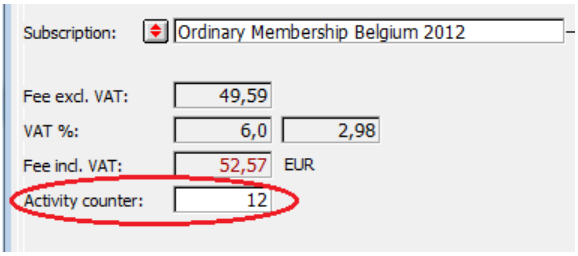
RELEASE NOTES - cmOffice

INTRODUCTION

SCOPE

cmOffice v.2.54b build 3, cmServer 2.54

FEATURES

NEW FEATURES


Module	Feature
Registrations	A partial invoice can be created if the user has a Registration authorization level > 3. The restriction that both the amount paid and authorized need to be 0 is dropped.
	If the default value “CheckIfMemberPaid” is True, the check in cmOffice if a relation is a member or not is extended with an additional control to see if the membership for the conference year is already paid. The conference year can be entered in the definition of a conference in the Administrator.
Member Registration	A new field “Activity counter” is added. This counter can be entered in the Member registration window.
