

ONSITE AND REMOTE ATTENDEES

ONSITE AND REMOTE PRESENTATIONS

ONLINE Q&A AND INTERACTION

E-POSTERS AND VIRTUAL EXHIBITION

Remote participation offered at virtual events, proved that this **attracts new target groups**

cmHybrid enables **remote participation to face-to-face events**

Extend your event's **global reach and life-cycle** and **create synergies** between all participant groups

COVR's cmHybrid features an **immediately accessible online equivalent** of your congress.

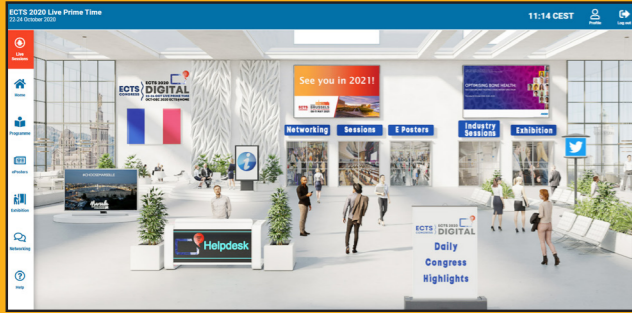

Fully browser-based; there is nothing to install. Managed **multi-tiered access** allows online access to **sessions, e-posters, networking, an online exhibition** and much more.

Session content is **live-streamed** to virtual session rooms and **available for on-demand view**, immediately following the session. Session rooms can be **individually branded** to maximise sponsor visibility. **Sub-titling and simultaneous translation** are available to attract globally diverse audiences.

Allow travel-restricted faculty to present remotely and to participate in live Q&A. Their contributions are **shared onsite** as well as to **remote participants**.

Interactive Q&A technology engages both **remote as onsite** participants and provides session chairs with **audience feedback**. An extensive networking module **allows participants to make connections** and **organize instant chat and video conversations**.

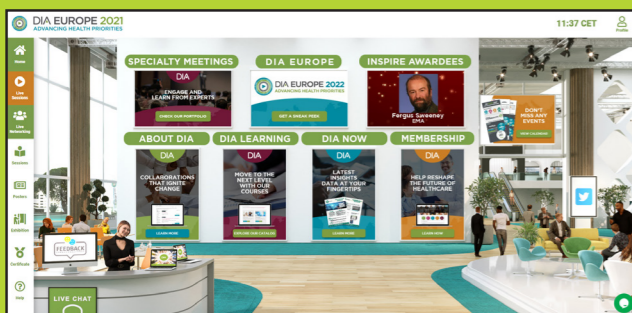

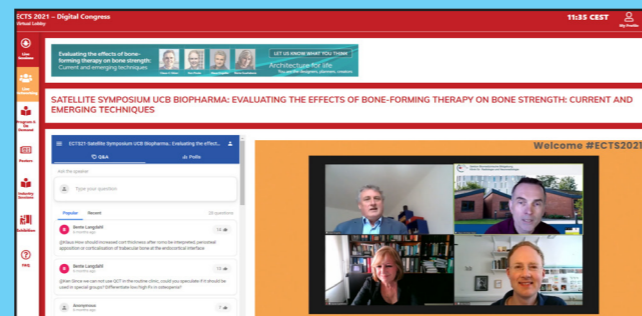

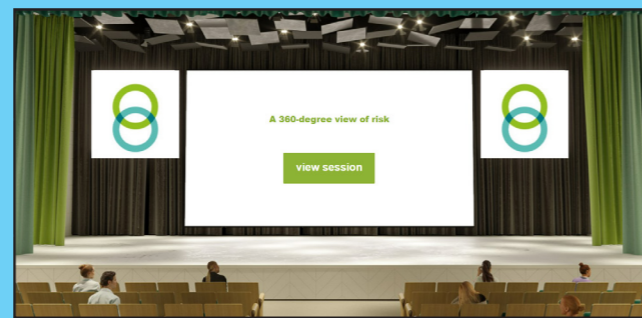

Your congress on the web

- Full-fledged online extension of congress.
- Runs in a browser on desktops, laptops, as well as on mobile devices.
- No software to be installed !

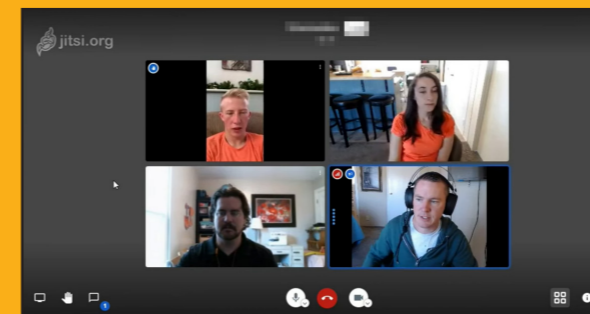

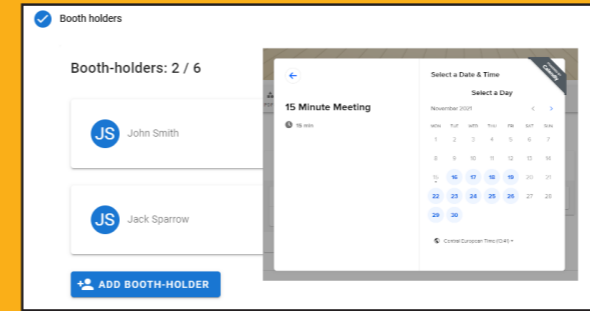

- Individually brandable meeting rooms.
